

IMPORTANT INFORMATION TO HELP PREVENT THE SPREAD OF CORONAVIRUS

**NEW GOVERNMENT GUIDELINES URGE US TO REMAIN VIGILANT
OF SPREADING GERMS AND BACTERIA TO ONE ANOTHER.**

Jangro have put this leaflet together with a selection of recommended products to help you achieve a safe and germ-free environment.

WHAT IS CORONAVIRUS?

A coronavirus is a type of virus. As a group, coronaviruses are common across the world. Typical symptoms of coronavirus include fever and a cough that may progress to a severe pneumonia causing shortness of breath and breathing difficulties.

Generally, coronavirus can cause more severe symptoms in people with weakened immune systems, older people, and those with long-term conditions like diabetes, cancer and chronic lung disease.

Wuhan novel coronavirus (WN-CoV) is a new strain of coronavirus first identified in Wuhan City, China. WN-CoV is a new respiratory illness that has not previously been seen in humans, it is not known exactly how the virus spreads from person to person, but similar viruses spread by cough droplets.

While the risk to the UK population remains low, this is a highly precautionary measure to limit the potential spread of infection.

ADVICE FOR TRAVELLERS FROM WUHAN

If you have returned from Wuhan in the last 14 days:

- stay indoors and avoid contact with other people as you would with other flu viruses
- call NHS 111 to inform them of your recent travel to the city

If you are in Northern Ireland, call your GP.
Please follow this advice even if you do not have symptoms of the virus.

IF YOU DEVELOP SYMPTOMS

If you develop a fever, cough, runny nose, sore throat or difficulty breathing, you should continue to follow the advice above.

Please do not leave your home until you have been given advice by a clinician.

SYMPTOMS

SORE THROAT

COUGHING

DIFFICULTY BREATHING

RUNNY NOSE

FEVER

WHAT TO DO IF YOU THINK YOU HAVE THE SYMPTOMS OF CORONAVIRUS...

1. CALL NHS 111

2. STAY INDOORS AND LIMIT CONTACT WITH OTHERS

Please follow this advice even if you do not have symptoms of the virus.

**KEEP
HANDS
CLEAN**

PREVENTION AND CONTROL

WHO's standard recommendations for the general public to reduce exposure to and transmission of a range of illnesses are as follows, which include hand and respiratory hygiene, and safe food practices:

Frequently clean hands by using alcohol-based hand rub or soap and water.

When coughing and sneezing cover mouth and nose with flexed elbow or tissue – throw tissue away immediately and wash hands.

Avoid close contact with anyone who has fever and cough.

If you have fever, cough and difficulty breathing seek medical care early and share previous travel history with your health care provider.

When visiting live markets in areas currently experiencing cases of novel coronavirus, avoid direct unprotected contact with live animals and surfaces in contact with animals.

The consumption of raw or undercooked animal products should be avoided. Raw meat, milk or animal organs should be handled with care, to avoid cross-contamination with uncooked foods, as per good food safety practices.

PREMIUM BACTERICIDAL HAND SOAP | BK170

Unperfumed hand wash, ideal wherever food is prepared or served. Kills 99.999% of bacteria. Contains extra moisturiser to help prevent dry skin.
